

Our values and guiding principles

Value statement

Alliance envisions mutually beneficial interactions with Canada's Indigenous People that foster both parties' respective accountabilities and interests.

Guiding principles

Alliance believes it can achieve this vision through the recognition of Indigenous Rights; through meaningful and ongoing dialogue with Indigenous Communities; and, through the mutual acceptance of responsibility.

Alliance believes establishing and maintaining productive and positive relationships with Canada's Indigenous People is one of many key components of its long-term business strategy and responsible growth.

Alliance Pipeline recognizes the existence of Indigenous rights and understands that Indigenous people come from diverse communities with distinct values, customs, traditions and governance structures. Alliance's policy will be flexible to acknowledge the legal and socio-economic realities of Indigenous communities.
